

ABSTRACT

Computer login may comprise any user-determined submission. Account identification may be inferred by signature rather than explicitly stated. A plurality of discontinuous data blocks in a plurality of files may be employed for validation. The paths to data used in
5 validation may be multifarious, regardless of the prospects for successful authorization.

RELATED U.S. APPLICATION DATA

This application has the identical disclosure to provisional application 60/286,457 filed on April 26, 2001.
